

If you have an organic Bio Gro site and have been caught short by the withdrawal of PyGanic from the market then please be advised of the official position for using PYNZ28 as a replacement.

For processing facilities: PYNZ28 can be used under the following condition.

Please observe a withholding period of twice the legal limit or 48 hours, whichever is longer. During this time, no organic product may be stored or processed in affected areas.

For organic orchards: PYNZ28 can not be sprayed onto plants and crops.

For further information please contact...
